

Hi, my name is

Mohamed Omar.

I want to make things that make a difference.

I'm a High School student, passionate about computer science and modern technologies, and everything in between. I seek to build exceptional AI projects to literally change the world.

01. About Me

Hello! I'm Mohamed, a Junior Developer based in Egypt.

I enjoy creating things that live on the internet, whether that be websites, applications, or anything in between. My goal is to always build products that provide pixel-perfect, performant experiences with an obsessive attention to detail.

My career has taken several twists and turns, I've never stopped chasing my passion to find the right direction. Regardless that they were the best path for me or not, I've acquired a wealth of knowledge.

All I know about graphics comes from 2D animation. So I became a Designer. Later, I used my designing skills to create marketing materials for my company, which taught me important lessons about marketing and running an online business.

Here are a few technologies I've been working with recently:

- | | |
|---------------------|-----------------|
| ▷ JavaScript (ES6+) | ▷ HTML & (S)CSS |
| ▷ React | ▷ React Native |
| ▷ Shopify Liquid | ▷ Python |
| ▷ Swift | ▷ Photoshop |
| ▷ Premiere Pro | ▷ Illustrator |

02. Experiences

Shopify

Web Developer & UI Designer @ Shopify

April 2020 – Present

CS50m

▷ Worked as a Web Developer to build e-commerce themes for Shopify Platform.

CS50x

▷ Worked with Shopify's Liquid language and JavaScript

Mindyzer

Fiverr

03. Some Things I've Built

Featured Project
City Profile

A nicer look at your GitHub profile and repository stats with data visualizations of your top languages and stars. Sort through your top repos by number of stars, forks, and size.

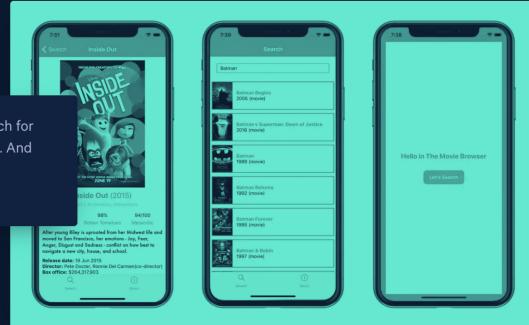

Next.js Chart.js GitHub API

Featured Project
Movie Browser

CS50 Mobile Project 2: It's a Mobile App Brower to search for your favorite movie info like its rating, director, and etc.. And built using React Native that works in IOS and Android. Watch this for more

JavaScript Node.js React.js React Native

Featured Project
Pomodoro Timer

CS50 Mobile Project 2: It's a Mobile App Timer that uses the Pomodoro technique for time management. And it vibrates after every interval and built using React Native that works in IOS and Android. Watch this for more

JavaScript Node.js React.js React Native

Payify

CS50's Final Project: It's a money transfer service that you can transfer money to any user on Payify by his email address but still on beta, You can't deposit or transfer real money yet. Watch this for more

Python JavaScript Flask SQLite Jekyll

Featured Project
Personal Website v2

My personal website, built with Next.js and Tailwind CSS. It includes a resume, portfolio, and contact information. Watch this for more

[Get In Touch](#)

A Pixel-Perfect Personal Website that gets improved as I learn something new. And now it's an open-source project on GitHub.

JavaScript React Node.js Gatsby

Featured Project Personal Website v1

My first portfolio website I designed and built. I learned quite a bit about HTML, CSS, and JavaScript. Since then, I think my web development and design skills have improved immensely.

HTML CSS JavaScript Bootstrap

Other Noteworthy Projects

[view the archive](#)

React Profile

The online version of my 2021 resume made for fun. I was interested in learning React.js, so I found a simple tutorial and it spun into a weekend project.

React CSS HTML

Witty Theme

A [Shopify](#) store theme with many powerful built-in plugins such as currency converter

JavaScript Shopify API SCSS Liquid

My TODO App

My TODO App is a simple Web TODO App written in JavaScript. [Try it here](#)

Node.js JavaScript HTML CSS
